

# SAM 7

The SAM 7 is a MANPAD or Man Portable Air-Defence system. It's a missile that can be fired from a shoulder-held launcher and has been used in conflicts worldwide. After wars have finished caches of this type of weapon can fall into the wrong hands and fuel other conflicts, feature in terrorist activities and have even been used to shoot down civilian aircraft.

MAG is a UK-based humanitarian organisation clearing weapon and munition caches, small arms and light weapons and other remnants of conflict for the benefit of communities worldwide.
